CHAIRMAN'S SPEECH

Dear Shareholders,

At the outset, please accept my sincere wishes for the good health and safety of you and your loved ones. I am delighted to welcome you all at the first (1st) Annual General Meeting and I would like to thank each one of you for making it convenient for joining this meeting.

I would like to place before you, few highlights of IrconGRHL.

IrconGRHL, a wholly owned subsidiary of Ircon, has been incorporated as a Special Purpose Vehicle on 24th December, 2020. The main object of IrconGRHL is to carry on the business of "Upgrading of Gurgaon-Pataudi-Rewari section of NH-352W from km 43.87 (design length 46.11 km) as a feeder route on Hybrid Annuity Mode under Bharatmala Pariyojana in the State of Haryana, in accordance with the terms of concession agreement with National Highways Authority of India (NHAI).

The concession agreement has been signed with the client -NHAI on 20th January, 2021 and the final set of complied documents required for financial closure have been submitted to NHAI well within time schedule i.e. 16th July, 2021.

IrconGRHL has signed the EPC Agreement with Ircon International Limited ('Ircon') for execution of the project work of on EPC mode at a total cost of 606.54 Crore plus 12% GST.

The total project bid cost is ₹900 Crore out of which 412.90 Crore is to be financed by way of Equity & Debt in the ratio of 1:3. The Company has availed the term loan facility of ₹309.68

Crore from Indian Overseas Bank (IOB) on 25th June, 2021 for execution of project. However, loan is yet to be disbursed by IOB.

As on 31st March, 2021, Net worth of your Company is ₹6.05 lakhs; Total income is ₹12.93 lakhs and Profit after tax is ₹1.05 lakhs.

Presently, the project is in development period and in process to receive Appointed Date to commence the construction activities. The operation and maintenance phase shall commence on completion of construction.

Compliances and Disclosures

Compliances and Disclosures under the Companies Act, 2013 and its associated rules there under are fully being adhered to. CPSE's constituted as Special Purpose Vehicle (SPV) are exempted from compliance with the DPE Guidelines on Corporate Governance for CPSEs. Hence, Corporate Governance guidelines of DPE are not applicable to your company.

Memorandum of Understanding (MoU)

Your Company has been incorporated on 24th December, 2020, hence the MoU for the Financial Year 2020-21 has not been signed with IRCON. However, your Company has requested for the exemption of signing of MoU with IRCON for the Financial Year 2021-22 in line with the DPE guidelines.

Acknowledgements

I, on behalf of Board of Directors, express my heartfelt thanks for the valuable assistance and co-operation extended to the Company by Ministry of Road Transport and Highways, National Highways Authority of India, Ircon International Limited and the Auditors of the Company. I acknowledge the efforts of the Company's employees, who are our most valuable asset. Their dedication, intellect, hard work, and deep sense of values is the key to take our company forward.

We look forward to your continued support in our journey ahead.

DIRECTORS' REPORT

Dear Members,

Your Directors have immense pleasure in presenting the **1st Annual Report** together with the Audited Financial Statements of the Company for the year ended 31st March, 2021.

1. BUSINESS OPERATIONAL HIGHLIGHTS: PRESENT STATE OF COMPANY'S AFFAIRS:

Ircon Gurgaon Rewari Highway Limited (IrconGRHL), a wholly owned subsidiary of Ircon International Limited (IRCON) incorporated on 24th December, 2020 as a Special Purpose Vehicle (SPV) for executing the project works in the State of Haryana by National Highways Authority of India (NHAI). The main object of IrconGRHL is to carry on the business of "Upgrading of Gurgaon-Pataudi-Rewari section of NH-352W from 0 km to 43.87 km (design length 46.11 km) as a feeder route on Hybrid Annuity Mode under Bharatmala Pariyojana in the State of Haryana, in accordance with the terms of concession agreement with NHAI.

The concession agreement has been signed with NHAI on 20th January, 2021 and the final set of complied documents required for financial closure have been submitted to NHAI well within time schedule i.e. 16th July, 2021 (within 150 days of signing the concession agreement plus additional One month interim relief / extension granted i.e by 19th July, 2021). Financial Closure has been achieved on 25th June, 2021. Further, in order to account for delay caused by the second wave of COVID, a letter seeking extension of additional 2 months for Appointed Date has been submitted to NHAI. Fulfilment of conditions precedent on account of land acquisition & forest clearance is also believed to be pending on part of NHAI. There is every likelihood that Appointed Date will get further delayed by one or more months.

Further in terms of concession agreement, the total project bid cost is ₹900 Crore and first year O&M cost is ₹2.5 Crore. The 40% of the project bid cost shall be reimbursed by NHAI during construction and balance 60% is receivable after construction in the form of Annuity. The total Project cost of ₹900 Crore out of which 412.90 Crore is to be financed by way of Equity & Debt in the ratio of 1:3. Accordingly, ₹309.68 Crore will be raised through Debt and ₹103.23 Crore by way of equity. The Company has availed the term loan facility of ₹309.68 Crore from Indian Overseas Bank (IOB) on 25th June, 2021 for execution of Project. However, loan is yet to be disbursed by IOB.

Presently, the project is in development period and in process to receive Appointed Date to commence the construction activities. The operation and maintenance phase shall commence on completion of construction. IRCON has also finalized its EPC Contractor through competitive bidding.

2. FINANCIAL HIGHLIGHTS:

In pursuance of the provisions enumerated under Companies (Indian Accounting Standards) Rules, 2015, the Company, has prepared its annual financial statements for the Financial Year 2020-21 as per Indian Accounting Standards (IND AS).

Independent Auditor's Report

To the Members of
Iron Gurgaon Rewari Highway Limited

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the standalone Ind AS financial statements of **Iron Gurgaon Rewari Highway Limited** ("the Company"), which comprise the standalone balance sheet as at 31 March 2021, and the standalone statement of profit and loss (including other comprehensive income), the standalone statement of changes in equity and the standalone statement of cash flows for the period from 24th December (i.e. the date of incorporation) to 31st March 2021, and the notes to the standalone financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, the profit and total comprehensive income, changes in equity and its cash flows for the for the period from 24th December (i.e. the date of incorporation) to 31st March 2021.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the state of affairs, profit and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude

that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matters

The opinion expressed in the present report is based on the information, facts and inputs made available to us through electronic means by the company. We wish to highlight that due to the COVID 19 induced restrictions on physical movement and strict timelines, the audit teams could not visit the project offices of the company for undertaking the required audit procedures as prescribed under ICAI issued Standards on Auditing.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the 'Annexure A', a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143 (3) of the Act, we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The standalone balance sheet, the standalone statement of profit and loss (including other comprehensive income), the standalone statement of changes in equity and the standalone statement of cash flows dealt with by this Report are in agreement with the books of account;
 - d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

- e) Being a government company, provision of section 164(2) of the Act are not applicable pursuant to the notification No. G.S.R.463(E) dated 5th June 2015, issued by the Central Government of India.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in 'Annexure B'.
- g) Being a government company, provision of section 197 of the Act are not applicable vide notification no. GSR 463 (E) dated 5th June 2015, issued by the Central Government of India.
- h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
- The Company has disclosed pending litigations and the impact on its financial position - refer note no. 15 to the Standalone Financial Statements.
 - The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
3. As required by Section 143(5) of the Act and as per directions issued by Comptroller and Auditor General of India, we report that:

S.no	Directions	Auditor's Replies
A	Whether the company has system in place to process all the accounting transactions through IT system? If yes, the implications of processing of accounting transactions outside IT system on the Integrity of the accounts along with the financial implications, if any, may be stated.	The Company has Tally accounting software to process all accounting transactions.
B	Whether there is any restructuring of an existing loan or cases of waiver/write off of debts/loans/interest etc. made by a lender to the company due to the company's inability to repay the loan? If yes, the financial impact may be stated. Whether such cases are properly accounted for? (In case, lender is a Government company, then this direction is also applicable for statutory auditor of lender company).	There is no restructuring of an existing loan or cases of waiver/write off of debts/loans/interest etc. made by a lender to the company due to the company's inability to repay the loan.
C	Whether funds (grants/subsidy etc.) received/receivable for specific schemes from Central/State Government or its agencies were properly accounted for/utilized as per its term and conditions? List the cases of deviation,	No fund have been received from Central/State Government or its agencies.

Annexure 'B'

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Ircon Gurgaon Rewari Highway Limited ("the Company") as of March 31, 2021 in conjunction with our audit of the financial statements of the Company for the for the period from 24th December (i.e. the date of incorporation) to 31st March 2021.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
3. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2021, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Pre-incorporation expense	5.34
Rent	1.13
Miscellaneous expenses	0.17
Total	9.42

(This space has been intentionally left blank)

11 Fair Value Instruments

(i) Category wise classification of Financial Instruments

Financial assets and financial liabilities are measured at fair value in these financial statement and are grouped into three levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirect

Level 3: Unobservable inputs for the asset or liability

a) The carrying values and fair values of financial instruments by categories as at 31 March, 2021 are as follows*:

Particulars	Carrying value	Fair Value		
		Level-1	Level-2	Level-3
Financial Assets at Amortized Cost				
Cash and cash equivalents	5.00	-	-	5.00
Other current financial assets	12.93	-	-	12.93
	17.93	-	-	17.93
Financial Liabilities at Amortized Cost				
Trade payables	12.81	-	-	12.81
Other financial liabilities	0.60	-	-	0.60
	13.41	-	-	13.41

The management assessed that cash and cash equivalents, trade payables, and other current financial assets/liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties.

12 Capital Management

Equity share capital and other equity are considered for the purpose of company capital management. The company manages its capital so as to safeguard its ability to continue as a going concern and to optimise returns to shareholders. The capital structure of the company is based on management's judgement of its strategic and day-to-day needs with a focus on total equity so as to maintain investor, creditors and market confidence. The management and the Board of Directors monitor the return on capital. The Group may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

13 Financial risk management objectives

The Company's activities expose it to a variety of financial risks: credit risk, market risk and liquidity risk. The Company's risk management is carried out by Finance & Accounts department under policies approved by the Board of Directors. The Board supervises overall risk management, as well as policies covering specific areas, such as liquidity risk.

a) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The table below provides details regarding the significant financial liabilities as at 31 March 2021

Particulars	As at 31 March 2021		
	< 1 Year	>1 Year	Total
Trade Payable	12.81	-	12.81
Other Financial Liability	0.60	-	0.60
Total	13.41	-	13.41

(This space has been intentionally left blank)

16 Earnings Per Share

Disclosure as per Ind AS 33 'Earnings per share'

Basic EPS is calculated by dividing the profit for the year attributable to equity holders by the weighted average number of equity shares outstanding during the year.

Diluted EPS is calculated by dividing the profit for the year attributable to the equity holders after considering the effect of dilution by weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

(i) Basic and diluted earnings per share (in Rs.)

Particulars	Note	For the year ended 31st March 2021
Profit attributable to Equity holders (Rs. in lakhs)	(ii)	1.05
No. of equity shares	(iii)	50,000
Earnings per share (Basic)		2.09
Earnings per share (Diluted)		2.09
Face value per share		10.00

(ii) Profit attributable to equity shareholders (used as numerator) (Rs. in lakhs)

Particulars	For the year ended 31st March 2021
Profit for the year as per Statement of Profit and Loss	1.05
Profit attributable to Equity holders of the company used for computing EPS:	1.05

(iii) Weighted average number of equity shares (used as denominator) (Nos.)

Particulars	For the year ended 31st March 2021
Opening balance of issued equity shares	
Equity shares issued during the year	50,000
Weighted average number of equity shares for computing Basic EPS	50,000
Dilution Effect:	
Add: Weighted average numbers of potential equity shares outstanding during the year	-
Weighted average number of equity shares for computing Diluted EPS	50,000

(This space has been intentionally left blank)

17 Revenue

A. Disaggregation of Revenue

Set out below is the disaggregation of the Company's revenue from contracts with customers into operating segment and type of product or services:

Type of Product or Services	For the year ended March 31, 2021					Total as per Statement of Profit and Loss /Segment Reporting	
	Revenue as per Ind AS 115			Method for measuring performance obligation			Other Revenue
	Domes- tic	Foreign	Total	Input Method	Output Method		
Highway	12.93	-	12.93	12.93	-	-	12.93
Total	12.93	-	12.93	12.93	-	-	12.93

B. Contract balances

Particulars	For the year ended 31st March 2021
Contract Assets (Note 4.2)	12.93

i) Contract Assets are recognised over the period in which services are performed to represent the Company's right to consideration in exchange for goods or services transferred to the customer. It includes balances due from customers under construction contracts that arise when the Company receives payments from customers as per terms of the contracts however the revenue is recognised over the period under input method. Any amount previously recognised as a contract asset is reclassified to trade receivables on satisfaction of the condition attached i.e. future service which is necessary to achieve the billing milestone.

Movement in contract balances during the year

Particulars	For the year ended 31st March 2021
Contract asset at the Beginning of the year	-
Contract asset at the end of the year	12.93
Net increase/(decrease)	12.93

ii) Contract liabilities relating to construction contracts are balances due to customers, these arise when a particular milestone payment exceeds the revenue recognised to date under the input method and advance received in long term construction contracts. The amount of Advance received gets adjusted over the construction period as and when invoicing is made to the customer

17.1 Service Concession Arrangements

Public to private service concession arrangements are recorded in accordance with Appendix "D"- Service Concession Arrangements (Ind AS-115). Appendix "D" is applicable if:

- The Grantor controls or regulates which services the operator should provide with the infrastructure, to whom it must provide them, and at what price; and
- The Grantor controls- through ownership, beneficial entitlement, or otherwise- any significant residual interest in the infrastructure at the end of the term of the arrangement.

If both of the above conditions are met simultaneously, a financial asset is recognized to the extent that the operator has an unconditional contractual right to receive cash or other financial asset from or at the discretion of the Grantor for the service.

These financial assets are initially recognized at cost, which is understood as the fair value of the service provided plus other direct costs directly attributable to the operation. They are then stated at amortized cost at the end of each financial year.

Irecon Gurgaon Rewari Highway Limited (IGRHL) has entered into service concession arrangement with National Highway Authority of India (NHAI) dated . in terms of which NHAI (the grantor) has authorized the company for upgradation of Gurgaon pataudi Rewari section of NH-352W from Km 0.00 to Km 43.87 (design length 46.11 km) as a feeder route on Hybrid annuity mode under Bharatmala Pariyojana in the state of Haryana . In terms of the said agreement IGRHL has an obligation to complete construction of the project of four/six laning road and to keep the project assets in proper working condition including all projects assets whose lives have expired. The Project is under Annuity pattern.

Ircon Gurgaon Rewari Highway Limited

CIN:-U45309DL2020GOI374941

Notes to financial statements for the year ended 31st March, 2021

(All amounts in Indian Rupees Lakhs unless otherwise stated)

The Concession period shall be 15 years commencing from the appointed date. At the end of the concession period, the assets will be transferred back to National Highway Authority of India (NHAI).

In case of material breach in terms of agreement the NHAI and IrconGRHL have right to terminate the agreement if they are not able to cure the event of default in accordance with such agreement.

The company has recognized receivable of Rs.12,93,373/- under service concession arrangement and shown under Other Financial current Assets which it will receive as per terms of the contract based on the completion of milestone, as on 31st March 2021.

Disclosure in terms of Appendix D of Ind AS 115

IRCON Gurgaon Rewari Highway Limited

CIN:-U45309DL2020GOI374941

Notes to financial statements for the year ended March 31, 2021

1. Corporate Information

Ironcon Gurgaon Rewari highway Limited (IronconGRHL) is a wholly owned subsidiary of Ironcon International Limited (IRCON), public sector construction company domiciled in India. IronconGRHL (CIN U45309DL2020GOI374941) is incorporated under the provisions of the Companies Act, 2013 applicable in India. The Company came into existence when IRCON was awarded the work of "Upgradation of Gurgaon-Pataudi-Rewari section of NH-352 from Km 0.00 to Km 43.87 (design length 46.11 Km) as feeder route on Hybrid annuity mode under Bharatmala Pariyojna in the State of Harayana" in accordance with the terms and conditions in the Concession Agreement by National Highway Authority of India (NHAI). In pursuant to the provisions of "Request for Proposal", the selected bidder 'IRCON' has formed a Special Purpose Vehicle (SPV) named Ironcon Gurgaon Rewari Highway limited as wholly owned subsidiary of IRCON, incorporated on 24.12.2020. Accordingly, IronconGRHL has signed the Concession Agreement with NHAI on 13 Jan, 2021 for the project value amounting to Rs 900 Crore. The Concession period is 730 days commencing from Appointed Date i.e. 21 June 2021 as notified by NHAI. The registered office of the company is located at C-4, District Centre, Saket, New Delhi- 110017.

The presentation and functional currency of the company is Indian Rupees (INR). Figures in financial statements are presented in lakh, by rounding off upto two decimals except for per share data and as otherwise stated.

2. Significant Accounting Policies

2.1 Basis of preparation

The financial statements of the Company have been prepared in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 read together with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the financial statements.

The financial statements have been prepared on a going concern basis following accrual system of accounting. The Company has adopted the historical cost basis for assets and liabilities, except for the following assets and liabilities which have been measured at fair value:

- Provisions, where the effect of time value of money is material are measured at present value
- Certain financial assets and liabilities measured at fair value
- Defined benefit plans and other long-term employee benefits

2.2 Summary of significant accounting policies

A summary of the significant accounting policies applied in the preparation of the financial statements are as given below. These accounting policies have been applied consistently to all periods presented in the financial statements.

2.2.1 Current vs non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

The Company classifies all other assets as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for atleast twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

2.2.2 Property, plant and equipment

Recognition and Initial Measurement

Property, plant and equipment is recognized when it is probable that future economic benefits associated with the item will flow to the Company and the cost of each item can be measured reliably. Property, plant and equipment are initially stated at their cost.

Cost of asset includes

- a) Purchase price, net of any trade discount and rebates
- b) Borrowing cost if capitalization criteria is met
- c) Cost directly attributable to the acquisition of the assets which incurred in bringing asset to its working condition for the intended use
- d) Incidental expenditure during the construction period is capitalized as part of the indirect construction cost to the extent the expenditure is directly related to construction or is incidental thereto.
- e) Present value of the estimated costs of dismantling & removing the items & restoring the site on which it is located if recognition criteria are met.

Freehold land is carried at historical cost.

Subsequent measurement

Property, plant and equipment are subsequently measured at cost net of accumulated depreciation and accumulated impairment losses, if any. Subsequent expenditure is capitalized if it is probable that future economic benefits associated with the expenditure will flow to the Company and cost of the expenditure can be measured reliably.

Cost of replacement, major inspection, repair of significant parts and borrowing costs for long-term construction projects are capitalized if the recognition criteria are met.

The machinery spares are capitalized if recognition criteria are met.

Depreciation and useful lives

Depreciation on property, plant and equipment, excluding freehold land is provided on straight line basis over the estimated useful lives of the assets as specified in schedule II of the Companies act, 2013.

Particulars	Useful lives (Years)
Building/flats residential/non-residential	60
Plant and Machinery	8-15
Survey instruments	10
Computers	3-6
Office Equipment's	5 - 10
Furniture and fixtures	10
Caravans, Camps and temporary shed	3-5
Vehicles	8-10

Depreciation on additions to/deductions from property, plant and equipment during the period is charged on pro-rata basis from/up to the date on which the asset is available for use/disposed

Each part of an item of Property, Plant and Equipment is depreciated separately if the cost of part is significant in relation to the total cost of the item and useful life of that part is different from the useful life of remaining asset. Leasehold land acquired on perpetual lease is not amortized.

Property plant and equipment acquired during the period, individually costing up to Rs. 5000/- are fully depreciated, by keeping Re. 1 as token value for identification. However, Mobile phones provided to employees are charged to statement of profit and loss irrespective of its value.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted prospectively, if appropriate. "Ordinarily, the residual value of an asset is up to 5% of the original cost of the asset" as specified in Schedule II of the Companies Act, 2013

Derecognition

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognized.

Capital work in progress

Capital work-in-progress represents expenditure incurred in respect of capital projects and are carried at cost less accumulated impairment loss, if any.

Intangible assets

Recognition and initial measurement

Intangible assets are recognized when it is probable that the future economic benefits that are attributable to the asset will flow to the Company and cost of the asset can be measured reliably. Intangible assets acquired separately are measured on initial recognition at cost. The cost comprises purchase price, borrowing cost if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the statement of profit or loss in the period in which the expenditure is incurred. Intangible assets not ready for the intended use on the date of the Balance Sheet are disclosed as "Intangible assets

underdevelopment”

Subsequent measurement and amortization

Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Software cost up to Rs. 1 Lakhs in each case is fully amortized in the period of purchase, by keeping Rs. 1 as token value for identification.

The cost of capitalized software is amortized over a period 36 months from the date of its acquisition.

Amortization on additions to/deductions from Intangible Assets during the period is charged on pro-rata basis from/up to the date on which the asset is available for use/disposed

Amortization methods, useful lives and residual values are reviewed at each reporting period and adjusted prospectively, if appropriate.

Derecognition

An intangible asset shall be derecognized on disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds if any and the carrying amount of the asset and are recognized in the statement of profit or loss when the asset is de-recognized.

2.2.3 Impairment of non-financial assets

At each reporting date, the Company assesses, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount and the impairment loss, including impairment on inventories are recognized in the statement of profit and loss.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior period. Such reversal is recognized in the statement of profit and loss.

Inventories

Inventories (including scrap) are valued at the lower of cost and net realisable value. Cost includes cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on First in First out (FIFO) basis. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Construction work-in-progress is valued at cost till such time the outcome of the job cannot be ascertained reliably.

The initial contract expenses on new projects for mobilization are recognized as construction work-in-progress in the year of incidence, and pro rata charged to statement of profit and loss of the project over the period at the same percentage as the stage of completion of the contract as at the end of reporting period. Site mobilization expenditure to the extent not written off valued at cost.

In Cost Plus contracts, where the cost of all materials, spares and stores not reimbursable as per the terms of the contract is shown as inventory valued as per (a) above.

Loose tools are expensed in the period of purchase.

2.2.4 Revenue recognition

The Company recognise a financial asset to the extent that it has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor ("NHAI") for the construction services and Operation & Maintenance services.

Such financial assets are initially measured at fair value i.e. present value and subsequently at amortized cost using the Effective Interest Rate (EIR) method. Under this method, financial asset will be increased for the financing element and reduced as and when money is received from grantor.

The Company recognizes and measures revenue from construction and Operation & Maintenance services in accordance with Ind AS -115 "Revenue from Contracts with Customers".

Company combine the two or more contracts entered into at or near the same time with the same customer and account for the contracts as a single contract if contracts are negotiated as a package with a single commercial objective or amount of consideration to be paid in one contract depends on the price or performance of the other contract or goods or services promised in the contracts are single performance obligation.

Transaction price (it does not involve significant financing component) is the price which is contractually agreed with the customer for provision of services. Revenue is measured at the transaction price that is allocated to the performance obligation and it excludes amounts collected on behalf of third parties i.e GST and is adjusted for variable considerations.

The nature of Company's contract gives rise to several types of variable consideration including escalation and liquidated damages.

Any subsequent change in the transaction price is then allocated to the performance obligations in the contract on the same basis as at contract inception.

The Company recognizes revenue for variable consideration when it is probable that a significant reversal in the amount cumulative revenue recognized will not occur. The company estimates the amount of revenue to be recognized on variable consideration using most likely amount method.

Consequently, amounts allocated to a satisfied performance obligation are recognised as revenue, or as a reduction of revenue, in the period in which the transaction price changes.

The company satisfies a performance obligation and recognizes the revenue over time, if any of the following criteria is met:

- a) The customer simultaneously receives and consumes the benefits provided by the entity's performance as the entity performs.
- b) The entity's performance creates or enhances an asset (for example, work in progress) that the customer controls as the asset is created or enhanced or
- c) The entity's performance does not create an asset with an alternative use to the entity and the entity has an enforceable right to payment for performance completed to date.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress, using percentage completion method, towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation. However, where the Company is not be able to reasonably measure the outcome of a performance obligation, but the Company expects to recover the costs incurred in satisfying the performance obligation, the Company recognise revenue only to the extent of the costs incurred until such time that it can reasonably measure the outcome of the performance obligation.

Performance obligation is measured by applying input method. In the contracts where performance obligation cannot be measured by input method, the output method is applied, which faithfully depict the Company's performance towards complete satisfaction of the performance obligation.

Contract modifications are accounted for when additions, deletions or changes are approved either to the contract scope or contract price.

The accounting for modifications of contracts involves assessing whether the services added to the existing contract are distinct and whether the pricing is at the standalone selling price. Services added that are not distinct are accounted for on a cumulative catch up basis, while those that are distinct are accounted for prospectively, either as a separate contract, if additional services are priced at the standalone selling price, or as a termination of existing contract and creation of a new contract if not priced at the standalone selling price.

a) Contract balances

- Contract assets: A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional
- Trade receivables: A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due).
- Contract liabilities A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract

b) Other income

Dividend income is recognized when the right to receive payment is established.

Interest income is recognized using Effective Interest rate method.

Miscellaneous income is recognized when performance obligation is satisfied and right to receive the income is established as per terms of contract.

2.2.5 Borrowing cost

Borrowing costs consist of interest and other costs that the Company incurs in connection with the borrowing of funds. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are charged to statement of profit and loss as incurred. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

2.2.6 Taxes

a) Current income Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities in accordance with relevant tax regulations. Current tax is determined as the tax payable in respect of taxable income for the period and is computed in accordance with relevant tax regulations. Current income tax is recognized in statement of profit and loss except to the extent it relates to items recognised outside profit or loss in which case it is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

b) Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognized in statement of profit and loss except to the extent it relates to items recognised outside profit or loss, in which case is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each

reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

2.2.7 Employee benefit

a) Short-term employee benefits

Employee benefits such as salaries, short term compensated absences, and Performance Related Pay (PRP) falling due wholly within twelve months of rendering the service are classified as short-term employee benefits and undiscounted amount of such benefits are expensed in the statement of profit and loss in the period in which the employee renders the related services.

b) Post-employment benefits

The Post employment benefits & other long term Employee Benefits are considered as per the guidelines of Ircan International Limited, the Holding Company, for the employees on the deputation from the Holding Company. And there is no post employment benefits to the contractual employees.

2.2.8 Cash and cash equivalents

Cash and cash equivalent include cash on hand, cash at banks and short-term deposits with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of unrestricted cash and short-term deposits, as defined above as they are considered an integral part of the Company's cash management.

2.2.9 Dividend

Annual Dividend distribution to the Company's equity shareholders is recognized as liability in the period in which dividend is approved by the shareholders. Any interim dividend is recognized as liability on approval by the Board of Directors. Dividend payable and corresponding tax on dividend distribution is recognized directly in equity.

2.2.10 Provisions, contingent assets and contingent liabilities

a) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, considering the risk and uncertainties surrounding the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Provisions recognised by the Company include provisions for Maintenance, Demobilization, Design Guarantee, Legal Cases, Corporate Social Responsibility (CSR), Onerous Contracts and others.

b) Onerous contracts

An onerous contract is a contract under which the unavoidable costs (i.e., the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it. If the Company has a contract that is onerous, the present obligation under the contract is recognised and measured as a provision. However, before a separate provision for an onerous contract is established, the Company recognises any impairment loss that has occurred on assets dedicated to that contract.

These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

c) Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation or present obligations that may but probably will not, require an outflow of resources embodying economic benefits or the amount of such obligation cannot be measured reliably. When there is possible obligation or a present obligation in respect of which likelihood of outflow of resources embodying economic benefits is remote, no provision or disclosure is made.

These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

d) Contingent assets

Contingent assets are not recognized though are disclosed, where an inflow of economic benefits is probable.

2.2.11 Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The Company's lease liabilities are included in financial liabilities

iii) Short term lease and leases of low value assets

The Company applies the short-term lease recognition exemption to its short-term leases contracts including lease of residential premises and offices (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

The Company has given adjustments for lease accounting in accordance with Ind AS 116 which came into effect on 1 April 2019, and all the related figures have been reclassified/ regrouped to give effect to the requirements of Ind AS 116.

a) Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.2.12 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a) Financial assets

Initial recognition and measurement

All Financial assets are recognised initially at fair value plus or minus transaction cost that are directly attributable to the acquisition or issue of financial assets (other than financial assets at fair value through profit and loss). Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in statement of profit and loss.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

• Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- a. The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b. Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

• Debt instruments at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- a. The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b. Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Debt instruments included within the FVTOCI category are measured initially as well as at

each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to statement of profit and loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income in statement of profit and loss using the EIR method.

- **Debt instruments at FVTPL**

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

- **Equity instruments**

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to statement of profit and loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of profit and loss.

Impairment of financial assets

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR.

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- Financial assets that are debt instruments and are measured as at FVTOCI
- Lease receivables under Ind AS 116
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115
- Loan commitments which are not measured as at FVTPL
- Financial guarantee contracts which are not measured as at FVTPL

The Company follows 'simplified approach' for recognition of impairment loss allowance on:

- Trade receivables or contract revenue receivables; and
- All lease receivables resulting from transactions within the scope of Ind AS 116

The application of simplified approach does not require the Company to track changes in

credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial asset. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the statement of profit and loss. The balance sheet presentation for various financial instruments is described below:

- Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.
- Debt instruments measured at FVTOCI: For debt instruments measured at FVOCI, the expected credit losses do not reduce the carrying amount in the balance sheet, which remains at fair value. Instead, an amount equal to the allowance that would arise if the asset was measured at amortised cost is recognised in other comprehensive income as the 'accumulated impairment amount'

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized only when the contractual rights to the cash flows from the asset expires or it transfers the financial assets and substantially all risks and rewards of the ownership of the asset.

The difference between the carrying amount and the amount of consideration received / receivable is recognised in the statement of profit and loss.

b) Financial liabilities

Initial recognition and measurement

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings other financial liabilities etc.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

- **Financial liabilities at fair value through profit or loss**

The company has not designated any financial liabilities at FVTPL.

- **Financial liabilities at amortized cost**

Loans, borrowings, trade payables and other financial liabilities

After initial recognition, Loans, borrowings, trade payables and other financial liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of profit or loss when the liabilities are de-recognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

c) **Financial guarantee contracts**

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

d) **Reclassification of financial assets**

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date

which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

e) Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount is reported in the balance sheet if there is a currently enforceable contractual legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.2.13 Fair value measurement

The Company measures financial instruments at fair value at each reporting period.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
 - In the absence of a principal market, in the most advantageous market for the asset or liability
- The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets and liabilities, if any. At each reporting date, the Company analyses the movements in the values of assets and liabilities which

are required to be remeasured or re-assessed as per the Company's accounting policies.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Above is the summary of accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

2.2.14 Non – current asset held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. The sale is considered highly probable only when the asset or disposal group is available for immediate sale in its present condition, it is unlikely that the sale will be withdrawn, and sale is expected within one year from the date of the classification. Disposal groups classified as held for sale are stated at the lower of carrying amount and fair value less costs to sell. Property, plant and equipment, investment property and intangible assets are not depreciated or amortized once classified as held for sale. Assets classified as held for sale/distribution are presented separately in the balance sheet.

If the criteria stated by IND AS 105 “Non-current Assets Held for Sale” are no longer met, the disposal group ceases to be classified as held for sale. Non-current asset that ceases to be classified as held for sale are measured at the lower of (i) its carrying amount before the asset was classified as held for sale, adjusted for depreciation that would have been recognized had that asset not been classified as held for sale, and (ii) its recoverable amount at the date when the disposal group ceases to be classified as held for sale. The depreciation reversal adjustment related property, plant and equipment, investment property and intangible assets is charged to statement of profit and loss in the period when non-current assets held for sale criteria are no longer met.

2.2.15 Prior Period Adjustment

Errors/omissions discovered in the current year relating to prior periods are treated as immaterial and adjusted during the current year, if all such errors and omissions in aggregate does not exceed 0.50% of total operating revenue as per last audited financial statement of the Company.

2.2.16 Operating Segment

Operating segments are reported in the manner consistent with the internal reporting provided to the chief operating decision maker. Accordingly, the Company has identified one reporting segments i.e. Domestic.

2.2.17 Earnings Per Share

In determining basic earnings per share, the company considers the net profit attributable to equity shareholders. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the period. In determining diluted earnings per share, the net profit attributable to equity shareholders and weighted average number of shares outstanding during the period are adjusted for the effect of all dilutive potential equity shares.

2.2.18 Significant accounting estimates and judgments

The estimates used in the preparation of the said financial statements are continuously evaluated by the Company and are based on historical experience and various other assumptions and factors (including expectations of future events), that the Company believes to be reasonable under the existing circumstances. The said estimates are based on the facts and events, that existed as at the

reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date. Although the Company regularly assesses these estimates, actual results could differ materially from these estimates - even if the assumptions underlying such estimates were reasonable when made, if these results differ from historical experience or other assumptions do not turn out to be substantially accurate. The changes in estimates are recognized in the financial statements in the period in which they become known.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. Actual results could differ from these estimates.

a. Allowances for uncollected trade receivables

Trade receivables do not carry interest and are stated at their nominal values as reduced by appropriate allowances for estimated irrecoverable amount are based on ageing of the receivables balances and historical experiences. Individual trade receivables are written off when management deems not be collectible.

b. Defined benefit plans

The costs of post-retirement benefit obligation are determined using actuarial valuations by Ircan International Limited. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increase, mortality rates and future pension increases. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

c. Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. There are certain obligations which managements have concluded based on all available facts and circumstances are not probable of payment or difficult to quantify reliably and such obligations are treated as contingent liabilities and disclosed in notes Although there can be no assurance of the final outcome of legal proceedings in which the Company is involved. it is not expected that such contingencies s will have material effect on its financial position of probability.

d. Impairment of financial assets

The impairment provision for financial assets are based on assumptions about risk of default and expected loss rates. The company uses judgement in making these assumptions and selecting the inputs to the impairment calculation., based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

e. Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the nature of business differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing

interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective domicile of the companies.

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

f. Impairment of non financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model.

g. Non-current asset held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. The sale is considered highly probable only when the asset or disposal group is available for immediate sale in its present condition, it is unlikely that the sale will be withdrawn, and sale is expected within one year from the date of the classification.

h. Leases - Estimating the incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment.

i. Determining the lease term of contracts with renewal and termination options – Company as lessee

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company has lease contracts that include extension and termination options. The Company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

j. Revenue recognition

The Company's revenue recognition policy, is central to how the Company values the work it has

carried out in each financial year.

These policies require forecasts to be made of the outcomes of Contracts, which require, assessments and judgements to be made on changes in scope of work and claims and variations.

There are several long term and complex projects where the Company has incorporated significant judgements over contractual entitlements. The range of potential outcomes could result in a materially positive or negative change to underlying profitability and cash flow.

Estimates are also required with respect to the below mentioned aspects of the contract :

- Determination of stage of completion
- Estimation of project completion date
- Provisions for foreseeable losses
- Estimated total revenues and estimated total costs to completion, including claims and variations.

These are reviews at each reporting date and adjust to reflect the current best estimates

Revenue and costs in respect of contracts are recognized by reference to the stage of completion of the contract activity at the end of reporting period, measured based on proportion of contract costs incurred for work performed to the date relative to the estimated total contract costs, where this would not be representative of stage of completion. Variations in contract work and claims are included to the extent that amount can be measured reliably, and receipt is considered probable. When it is probable that contract costs will exceed total contract revenue, the expected loss is recognized as an expense immediately.
